

SINGLE PHASE MONOBLOCK PUMPS
TYPE CGH

SINGLE PHASE MONOBLOCK PUMPS - TYPE CGH

Convenient, reliable and durable pumps for the household for high head and reasonable discharge requirements. These are suitable for portable applications.

Applications:

- Overhead storage water tank filling
- Domestic water supply
- Suitable for portable applications
- Car washing
- Pressure boosting and high head applications

Construction Features:

Motor

- Rugged single phase TEFC 2900 RPM motor
- Suitable for 200-240V 50Hz power supply
- In-built thermal overload protector

- Rigid cast iron motor frame with handle
- Efficient permanent split- capacitor motor

Pump

- Rigid cast iron casing with precision machined inner surfaces
- Sturdy bronze impeller, safe against wear and tear
- Bronze shaft sleeve
- Carbon vs. ceramic mechanical seal

Important

It is strongly recommended that a good quality foot-valve with strainer is used.

Warranty

All products carry a 12 months warranty from date of purchase against manufacturing defects.

Due to continuous efforts at improving value, information furnished is subject to change without notice.
