Single Phase Portable Submersible Residual Water Drainage Pumps

CRDS Series

Salient Features

- ◆ Highly reliable floor level residue drainage pump.
- ◆ Wear parts made of abrasion resistant materials ensuring durability.
- ◆ Start pumping at a water level of minimum 5mm.
- ◆ Capable of pumping water down to 1 mm level.
- ◆ Light weight and Compact.
- ◆ Low maintenance cost.
- ◆ Discharge direction can be altered to prevent folding or bending of discharge hose.

Applications

- ◆ Ideal pump for complete drainage of flat surfaces.
- ◆ Cleaning and draining of underground sumps, swimming pools and fish ponds.
- ◆ Draining of Basement parking, Roof tops, Parking lots, Service / Utility pits, Plant maintenance / Clean up.

Constructional Features

Motor

- ◆ Single phase submersible induction motor.
- ◆ Dual mechanical seal with two silicon carbide sealing ensures durability
- ◆ Oil lifter provides efficient lubrication and cooling of seal faces, extending mechanical seal life.
- ◆ In built thermal overload protector.
- ◆ Anti wicking cable entry prevents water incursion into the motor.

Pump

- ◆ Urethane Rubber, Semi Voltex Impeller for maximum durability and Pump performance.
- ◆ Base plate with rubber lining prevents scratching of floors.
- ◆ Cast iron casing
- ◆ Stainless steel shaft.

Product Data

MODEL	: CRDS Series
HP \ kW Rating	: 0.5 HP / 0.4 kW
Delivery Size	: 50 mm
Head Range	: upto 10 m
Discharge Range	: 50 lpm to 110 lpm

*Due to continuous efforts at improving value, information furnished above is subject to change without notice.

Warranty - All products carry a 12 months warranty from the date of purchase against manufacturing defects

Manufactured **Exclusively** by:
